

TRICOLORE

Design by

Hertel & Klarhoefer

Description

Modular shelving in satin lacquered MDF. Each shelf may be positioned with its opening facing either upwards or to the rear. Each pack is supplied with 4 white plastic shutters (intended for the uppermost shelf), 4 metal uprights for linking and 4 grey felt gliders for levelling the shelf which is to be placed on the ground.

The simplicity of the concept belies the complicated nature of the production process, with its mitre joints and bevelled edges.
